THUY LINH DANG (CINDY)

Business Analytics · Data & BI · Consumer & Market Insight

Hanoi, Vietnam | +84 39 247 2871 | danglinh260981@gmail.com | linkedin.com/in/cindy-linh-dang

Available full-time in Hanoi: December 2026 – March 2027 | Portfolio: cindylinh.github.io/portfolio | GitHub: github.com/cindylinh

PROFILE

Final-year Business Analytics student at La Trobe University, Australia (WAM 89/100) who turns messy, real-world data into clear recommendations for decision-makers. Business analyst internship experience analysing workforce data for management, client research at EY, and part of the 6-person team that won the LTU × NAB WIL Challenge 2026. Works in Python, SQL, Power BI, Tableau and Excel; Vietnamese (native), English (IELTS 8.0), Korean (conversational).

EDUCATION

Bachelor of Business Analytics (Marketing Major) — La Trobe University, Melbourne, Australia *Expected mid-2027*

- **Weighted Average Mark (WAM) 89/100** (High Distinction, top grade band); Provost's Commendation 2025 for Academic Excellence; 50% Student Ambassador Scholarship
- Relevant coursework: Predictive Analytics (Machine Learning), Data Engineering & Python, Data Visualisation (Tableau, SQL), Customer Analytics, Market Research, Generative AI for Business

EXPERIENCE

Business Analyst Intern — Darling Daughters, Melbourne (disability & aged care provider) *Jul – Oct 2026*

- Scoped a key question with management (can the business still deliver reliably after a staff reduction?) and analysed **4,136 shifts (17,492 hours)** from 6 workforce-scheduling system exports in Excel Power Query.
- Found **shifts fell 12% but hours only 7%**, with cuts concentrated in community services (−25%) and evening work (−73%), and flagged a risk as one site grew from **32% to 45%** of all hours.
- Presented 4 recommendations, **all adopted into operations**, plus a monthly dashboard of staff, hours and unfilled shifts.
- Benchmarked competitors and pitched a 3-month growth strategy to supervisors and partners.

Market Research Interviewer — EY Studio+ (EY's research division in Australia) *Mar – Oct 2026*

- Collected and cleaned primary research data from interviews and observation for client projects, including a Public Transport Victoria passenger study, checking records for completeness and accuracy against strict data-quality protocols.

Student Consultant — Study Australia Industry Experience Program *Dec 2025*

- In a 6-person consulting team, analysed 6 competitors for a premium pet-care start-up using a 7-metric framework and proposed a 3-tier pricing strategy; **the client confirmed the findings shaped its strategy**.

ANALYTICS & AI PROJECTS

Flood Early-Warning Dashboard — LTU × NAB WIL Challenge (Katherine Town Council case) *Excel, Python, Tableau* *2026*

- **Winner, LTU × NAB WIL Challenge 2026 and Best Capstone Project (La Trobe Business School):** described by the NAB judge as the best dashboard in the challenge's three years.
- In a 6-person consulting team, owned the initial exploration of public rainfall and river height data (Long Paddock, Bureau of Meteorology), co-built the Tableau dashboard tracking both against flood alert levels, and wrote the delivery plan.

AI Agent for Buyer Quote Requests — Ha Bac Export Garment (HABAC), Vietnam *Make.com, GPT-4o, RAG* *2026*

- Mapped a Vietnamese garment exporter's slow, manual quote-request process and prototyped two automations: a GPT-4o assistant and a RAG AI agent that checks capability and pricing data before drafting replies for staff approval; **scored 100/100.**

New York City Mobility Data Pipeline *Python, SQL, DuckDB, GeoPandas* *2026*

- Engineered a reproducible Python–SQL pipeline combining **16.8M+** taxi, subway, bus and bike-share records, and built a framework to prioritise city zones for transport improvements; **scored 99/100, selected as a class exemplar**.

Diabetes Risk Prediction (Machine Learning) *Python (scikit-learn), Orange* *2026*

- Cleaned 16,360 health records (missing values, outliers, category standardisation) and compared Logistic Regression, Decision Tree and SVM models, using information-gain feature selection and GridSearchCV tuning.
- Best model (Logistic Regression): **0.833 AUC**, 75% accuracy, 10 key risk factors identified; **scored 100/100, ranked 1st in cohort.**

LEADERSHIP & AWARDS

- **Best Public Speaker,** Benetas x La Trobe Innovation Sprint: designed an AI-driven staffing solution from client data.
- **Student Ambassador:** La Trobe University (2024 – Present); City of Melbourne International Student Ambassador (2026 – Present).
- **Marketing & Communications Team, Vietnam High School Business Case Competition (VHBC, 2023):** campaigns reached 15,000+ users, driving 200+ registrations and 600+ attendees.

SKILLS & CERTIFICATIONS

- **Data & technical:** SQL, Python, Power BI, Tableau, Excel (Power Query), scikit-learn, DuckDB, GeoPandas
- **AI & automation:** Make.com workflow automation, RAG / AI agents, prompt engineering, generative AI workflow design
- **Certifications & programs:** Google Analytics (GA4); Google Data Analytics; Meta Marketing Analytics; Certiport IT Specialist – Python; Microsoft Office Specialist – Excel; McKinsey Forward Program
- **Languages:** Vietnamese (native), English (IELTS 8.0), Korean (conversational)
- **References:** available on request, including NAB (challenge judge) and EY consultants
