THUY LINH DANG (CINDY)

Business Analytics · Data & BI · Consumer & Market Insight

Hanoi, Vietnam | +84 39 247 2871 | danglinh260981@gmail.com | linkedin.com/in/cindy-linh-dang

Available full-time in Hanoi: December 2026 – March 2027 | Portfolio: cindylinh.github.io/portfolio

PROFILE

Final-year Business Analytics student at La Trobe University, Australia (89/100 average, High Distinction) who turns messy data into clear, decision-ready advice. Winner of the National Australia Bank (NAB) Capstone Challenge 2026 with a flood early-warning dashboard, with consulting-style business analyst experience turning workforce data into recommendations for management, and client research fieldwork at EY. Works in Python, SQL, Tableau, Power BI and Excel; Vietnamese (native), English (IELTS 8.0).

EDUCATION

Bachelor of Business Analytics (Marketing Major) — La Trobe University, Melbourne, Australia *Expected mid-2027*

- **Weighted Average Mark (WAM) 89/100** (High Distinction, top grade band); Provost's Commendation 2025 for Academic Excellence; 50% Student Ambassador Scholarship
- Relevant coursework: Predictive Analytics (Machine Learning), Data Engineering & Python, Data Visualisation (Tableau, SQL), Customer Analytics, Market Research, Generative AI for Business

ANALYTICS PROJECTS (BUILT ON REAL PUBLIC GOVERNMENT DATA)

Flood Early-Warning Dashboard — Katherine Town Council, Northern Territory, Australia *Excel, Python, Tableau* *2026*

- **Winner, NAB Capstone Challenge 2026:** judged the best dashboard and solution since the challenge began.
- Combined rainfall data (Long Paddock) and river height data (Australia's Bureau of Meteorology) into a dashboard tracking 30-day rainfall against a 450mm alert level and river height against the 16m flood level, telling the council when to prepare.
- Found that early wet-season (Oct–Dec) rainfall strongly predicts flooding because river levels rise with a delay, that a single 100mm+ downpour pushing rainfall past 450mm removes that delay, and that floods are trending **less frequent but more severe**.

New York City Mobility Data Pipeline *Python, SQL, DuckDB, GeoPandas* *2026*

- Engineered a reproducible Python–SQL pipeline combining **16.8M+** taxi, subway, bus and bike-share records, and built a framework to prioritise city zones for transport improvements; **scored 99/100, selected as a class exemplar**.

Diabetes Risk Prediction (Machine Learning) *Python, Orange* *2026*

- Built an end-to-end classification model on 16,360 health records, from cleaning to tuning; the best model (Logistic Regression) reached **0.833 AUC** and identified 10 key risk factors. **Scored 100/100, ranked 1st in class.**

Melbourne Housing Opportunity Dashboard *Tableau* *2025*

- Built an interactive Tableau story across 13,580 property sales in 314 suburbs, creating value-vs-activity metrics to shortlist the 20 most promising suburbs.

EXPERIENCE

Business Analyst Intern — Darling Daughters, Melbourne (disability & aged care provider) *Jul – Oct 2026*

- Scoped a key question with management (can the business still deliver reliably after a staff reduction?) and analysed **4,136 shifts (17,492 hours)** from 6 workforce-scheduling system exports in Excel Power Query.
- Found **shifts fell 12% but hours only 7%**, with cuts concentrated in community services (−25%) and evening work (−73%), and flagged a risk as one site grew from **32% to 45%** of all hours.
- Presented **4 recommendations to management**, plus a dashboard to track staff, hours and unfilled shifts monthly.
- Benchmarked competitors and pitched a 3-month growth strategy to supervisors and partners.

Market Research Interviewer — EY Studio+ (EY's research division in Australia) *Mar – Oct 2026*

- Collected primary research data through interviews and observation for client projects, including a passenger study for Public Transport Victoria, with **zero data errors**.

Strategy Consultant — Study Australia Industry Experience Program *Dec 2025*

- In a 6-person consulting team, analysed 6 competitors for a premium pet-care start-up using a 7-metric framework and proposed a 3-tier pricing strategy; **the client confirmed the findings shaped its strategy**.

LEADERSHIP & AWARDS

- **Best Public Speaker,** Benetas x La Trobe Innovation Sprint: designed an AI-driven staffing solution from client data.
- **Marketing & Communications Team,** Vietnam High School Business Case Competition (2023): reached 15,000+ users, driving 200+ registrations and 600+ attendees.
- **Student Ambassador,** La Trobe University (East Asia, 2024 – Present) and City of Melbourne (Vietnam, 2026 – Present).

SKILLS & CERTIFICATIONS

- **Data & technical:** SQL, Python, Power BI, Tableau, Excel (Power Query), DuckDB, Microsoft Access
- **AI & automation:** prompt engineering, generative AI workflow design, chatbot building
- **Certifications:** Google Analytics (GA4); Google Data Analytics; Meta Marketing Analytics; Certiport IT Specialist – Python; Microsoft Office Specialist – Excel
- **Programs & languages:** McKinsey Forward Program; L'Oréal Brand Storm 2026 | Vietnamese (native), English (IELTS 8.0)
